# TESLA AeroStar T500

High cleaning efficiency with ECO motor

- ✓ AAA cleaning efficiency
- ✓ bagless cleaning with cyclone filtration technology
- ✓ very efficient HEPA H13 filter
- ✓ action radius up to 10 meters
- ✓ large dirt tank

The bagless floor vacuum cleaner TESLA AeroStar T500 is a useful helper in every household. It is characterized by high cleaning efficiency AAA using a new generation ecological motor, which guarantees more efficient floor cleaning with lower electricity consumption. The dirt sucked in by the vacuum cleaner is directed directly into the dirt container, so you do not have to change any dust bags. The capacity of the container of 3 liters is enough for dirt from the whole apartment. After vacuuming, the container can be easily washed with water and ready for further use. Cyclone filtration technology provides high suction power, which constantly rotates the air inside the vacuum cleaner and thus separates air and dirt. Together with the subsequent filtration using the output HEPA filter, there is a higher quality of filtration compared to conventional vacuum cleaners.

#### Dimensions

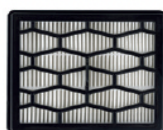

height, width, length: 400 x 280 x 340 mm, weight: 4,6 kg
