TESLA RoboStar T40

Maximum effective cleaning

- ✓ 2in1, rinses and wipes with water
- ✓ efficient intelligent vacuuming with memory
- ✓ support for virtual wall
- ✓ high suction power suitable for cleaning animal hair
- ✓ powerful and quiet digital BLDC motor
- ✓ state-of-the-art high-capacity batteries and charging stations

RoboStar T40 is an improved version of the popular RoboStar T30 model, which won the Product of the Year 2018 award at Heureka in the Vacuum Cleaners category. TESLA RoboStar T40 has been developed for cleaning various types of floors. Not even animal hair can stop him. It is equipped with a modern gyrosopic navigation FASTtrack 2.0 with a memory that ensures that the vacuum cleaner will not unnecessarily return to places already during vacuuming cleaned. The robotic vacuum cleaner will clean independently without any help and save you work and time. It crosses low transition rails easily and is equipped with a number of sensors to prevent falls and impacts. When cleaning is complete, it will search for a charging base and start charging.

Dimensions

diameter: 300 mm, **height:** 75 mm, **weight:** 2,2 kg
